SRS EHR - The Specialist's EHR™

Innovation Is in Our DNA.

We have always been innovators. First, we devised the best digital document-management system in the industry; then we evolved it into the first EHR that didn't require you to kneel down to the template, but rather let you set up the system to mirror your workflow. Next, we tackled meaningful use for specialists—keeping them productive while making them compliant. In fact, we were so successful that our specialists have collected close to one hundred million incentive dollars, and we rank 11th in total MU incentives earned with an ambulatory EHR—not bad for a company that's competing with 443 other HIT vendors, including the mammoths serving the hospital and primary-care markets. And now we are blazing new trails of productivity, interoperability, and extensibility by working toward enhancing the human relationships at the heart of healthcare.

Our industry-leading, total-practice EHR solution was custom designed for the practices of specialists and high-performing physicians. It improves physician productivity, boosts revenue, slashes overhead and enhances patient care. With an unmatched record of successful adoption, government certification for [Meaningful Use Stage 2](http://srssoft.com/meaningful-use) (<http://srssoft.com/meaningful-use>) and full [ICD-10](http://srssoft.com/icd-10) (<http://srssoft.com/icd-10>) readiness, you can be confident in your choice today, and in the future.

It All Starts with You.

In collaboration with the doctors and healthcare professionals who use our products, SRS creates specialty-practice HIT solutions that protect the doctor-patient relationship and enhance the human interactions within the practice. We achieve this by engaging clients in every step of the process—envisioning, developing, and testing. It's a collaboration that creates mutual accountability, transparency, and trust.

Technology for the Right Reasons and Results.

Technology is only relevant when it serves a purpose. At SRS, we believe that each specialist is unique, which is why we give them the flexibility to determine their own preferred styles and workflows, while also helping practice administrators achieve their goals.

Productivity

Whether you aim to see more patients, increase your reimbursement rates, or spend extra time with family, your goals are unique to you. That is why we first determine what *your* productivity targets are, and then help you reach them through the use of Smart Workflows™ (<http://srssoft.com/smart-workflows>) technology and the Unified Desktop™ (<http://srssoft.com/unified-desktop>) interface. The first allows you to assign each component part of the patient encounter to those best suited to complete it, and then lets you set your own preferred style for practicing medicine; the second provides an open and flexible architecture that lets you incorporate the best task-specific software solutions—Practice Management, PACS, and Patient Portal— giving you one-click access to all the information you need by delivering all clinical and business applications through one seamless user interface.

Compliance

Compliance is of paramount importance, but you shouldn't have to sacrifice productivity to achieve it. Our proactive government affairs team provides you with guidance and support, and our fully certified EHR solution ensures that necessary data is collected without inconveniencing the physician, staff, or patient.

Data Exchange

Along with the flexibility to determine how you practice medicine, SRS gives you the necessary cloud-computing power to handle all your data needs. Data you need every day is at your fingertips, while data needed for meaningful use and other heavy processing needs is stored and processed in the cloud. Your data will always be there—when you need it and where you need it.

SRS EHR capabilities include: meaningful use (<http://srssoft.com/products-capabilities-meaningful-use>), ICD-10 (<http://srssoft.com/products-capabilities-icd-10>), interoperability dashboard (<http://srssoft.com/products-capabilities-interoperability-dashboard>), ePrescribing (<http://srssoft.com/products-capabilities-eprescribing>), Electronic Prescribing of Controlled Substances (EPCS) (<http://srssoft.com/epcs>), order-and-lab management (<http://srssoft.com/products-capabilities-order-and-lab-management>), direct messaging (<http://srssoft.com/products-capabilities-direct-messaging>), patient engagement (<http://srssoft.com/products-capabilities-patient-engagement>), reporting (<http://srssoft.com/products-capabilities-reporting>), messaging and tasking (<http://srssoft.com/products-capabilities-messaging-and-tasking>), imageMD (<http://srssoft.com/products-capabilities-imagemd>), intake manager (<http://srssoft.com/products-capabilities-intake-manager>), and immunization management (<http://srssoft.com/immunization-management>)

Interoperability Is a Language We Speak.

True interoperability is achieved by speaking a common language with others in the HIT universe. Using industry standards, our team of technology linguists have designed secure pathways to exchange data with other ambulatory or hospital EHRs. Our clients also use secure direct messaging to communicate with other physicians and practices.

But that is not all—we believe in an open platform that allows our clients to select the best complementary HIT solutions—Practice Management, PACS, and Patient Portal—for their practice, as well as providing the ability to exchange vital information such as Transfer of Care (TOC) documents, communicate with registries, e-prescribe, and more.

Confidence Is Something We Earn.

By delivering on our promises and working with our clients to create solutions that help them utilize technology to realize their goals, we've earned the trust of a national network of happy clients who have made us their HIT partner. We'd like to earn your trust, too.

**This Complete EHR certification is 2014 Edition compliant and has been certified by Drummond Group Inc., an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of the U.S. Department of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments. (SRSsoft, v9, Complete EHR Ambulatory, Certification ID number 09182014-2960-8, September 18, 2014.) Modules Tested: 170.314(a)(1-15); 170.314(b)(1-5, 7); 170.314(c)(1-3); 170.314(d)(1-8); 170.314(e)(1-3); 170.314(f)(1-3); 170.314(g)(2-4) Clinical Quality Measures tested: CMS002v3; CMS022v2; CMS052v2; CMS056v2; CMS062v2; CMS065v3; CMS066v2; CMS068v3; CMS069v2; CMS075v2; CMS090v3; CMS117v2; CMS122v2; CMS123v2; CMS124v2; CMS127v2; CMS130v2; CMS131v2; CMS132v2; CMS133v2; CMS134v2; CMS135v2; CMS138v2; CMS139v2; CMS142v2; CMS143v2; CMS144v2; CMS145v2; CMS147v2; CMS148v2; CMS153v2; CMS155v2; CMS156v2; CMS158v2; CMS163v2; CMS165v2; CMS166v3; CMS167v2; CMS182v3. Additional software used: MS Excel, Surescripts Network for Clinical Interoperability, Emdeon. This certified product may require one-time costs for time and materials and/or ongoing monthly maintenance charges to cover routine updates for connecting to outside networks, labs, registries, and/or exchanges.*
