ICD-10

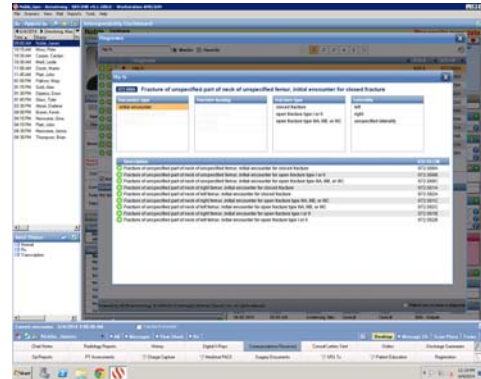

ICD-10 – SRS EHR v9 (the 2014 Edition of our certified EHR) incorporates SRS' physician-friendly code search—a powerful and easy-to-use application that leverages the IMO® Clinical Interface Terminology Portals.

(<http://srsoft.com/imo>) SRS is committed to helping you meet the October 1, 2015 deadline with ease.

- ICD-10 code search is clinician friendly, intuitive, and does NOT require the use of complex templates.
- Search experience leverages powerful technology and clinician-friendly search terms to identify codes quickly and efficiently in a productivity-focused workflow.

(<http://srsoft.com/assets/images/EHR%20Capabilities/ICD-10.png>)

- Appropriate ICD-9, ICD-10, SNOMED, LOINC, and CPT codes are simultaneously provided.
- The medical code list and search engine is integrated within the entire solution for numerous and immediate benefits.
- Diagnosis App includes built-in intelligence that identifies initial versus subsequent visits automatically and provides a full, detailed medical list from which to select the desired diagnosis.
- Patient education tools target the materials specific to a patient's diagnosis, and one click leads to a webpage with supporting patient engagement resources for the code selected

Benefits:

- **Fast code identification** – provides ICD-10 codes with minimal clicks and without requiring the use of complex templates
- **Physician satisfaction** – keeps physicians productive by making code selection easy and efficient
- **Enhanced patient care** – allows physicians to focus on patients, rather than coding, and provides greater specificity as well as targeted education material
- **Fulfillment of meaningful use requirements** – supports patient education and leverages IMO functionality for computerized physician order entry (CPOE) and the recording of family history and diagnosis codes
