Electronic Medical Records (EMR/EHR)?

h Record, or Electronic Medical Record, is a digital version of a patient's medical records. EHR d for over 30 years, but with the Health Information Technology for Economic and Clinical Health ed into law in 2009, EHR/EMR usage has become far more widely adopted, driven by ves. Now, due to Meaningful Use subsidies and changes in coding, the use of electronic medical g more and more pertinent.

Adopt EHR Software Technology?

I medical practice hinges on the use of sophisticated, intelligent IT. Our seamlessly IR system and software will help you achieve a higher quality of patient care with more efficiency nue.

deal when they include many practice management and billing functions that work together to ractice smoothly and productively. Our billing solutions and Clearinghouse will help you x:ice's true revenue potentials by streamlining your claim submission, providing excellent ding payment. Another seamlessly integrated part of our EHR / EMR system, the MediTouch nced enough to become an essential part of your workflow and provide the access, privacy s that you, your patients and their family members need. Our goal is to provide you with the tools p pace with our transitioning healthcare system.

gful Use certified EHR software allows providers who are able to demonstrate meaningful use of i record system each year will successfully avoid government penalties. Important note: 2014 is Ps can begin attesting for Meaningful Use. Although the future of the Meaningful Use program is ting set of standards may change, they will not be eliminated entirely. With MediTouch, built into the system, and with our Meaningful Use Report Card, there's virtually no "extra" work incentive payments. Our EHR programs are also ICD-10 ready so that you can easily manage set and avoid claim denials.

care with your Electronic Health Record

records improve the accuracy, accessibility and readability of medical records, since there's no physician handwriting. Having a universal record accessible by all treating physicians also of tests and delays in treatment. Using MediTouch EMR software gives you additional benefits, alerts and reminders that help further avoid medication errors and duplicates.

ease patient engagement and satisfaction

patient portal, your patients have private and secure access to their own electronic Personal R). Patients that have access to a patient portal tend to be more engaged in their own care, and ask questions and request medication refills online improves patient satisfaction. Access to, and patient portal is one of the requirements to achieve Meaningful Use Stage 2. MediTouch EHR /eaningful Use certified patient portal that helps you stay compliant with the CMS patient res.

efficiency with our medical charting software
