EHR EMR software allows you to  
automate workflow while  
improving your clinical accuracy  
& outcomes

Mobile tools, HealthWatcher &  
subnotes-on-the-fly for an  
entirely new way to manage  
health.

Comprehensive  
care.

AdvancedEHR clients benefit from our AdvancedCloud & AdvancedMobileDoc iOS app that makes your documentation tasks more manageable & better organized. AdvancedEHR is fully integrated with AdvancedScheduling & AdvancedBilling to make your software experience as seamless as possible. Staff can work in a single program, in a single database & enjoy the convenience of a single logon. This greatly reduces the need for multiple system data comparisons—a major source of frustration & wasted time.

# Unexpectedly simple.

## View your patient info, your way

Quickly scan allergy, medication and problems lists, plus review medical, family and social histories—within the same view. Best of all, you can configure the patient chart to your preference. Easily organize the EHR software to **compliment** your workflow.

### User-definable folders

Keep patient charts organized in folders that mimic paper charts.

### Role-based views & preferences

Each user and provider can create custom views and preferences.

### View the chart your way

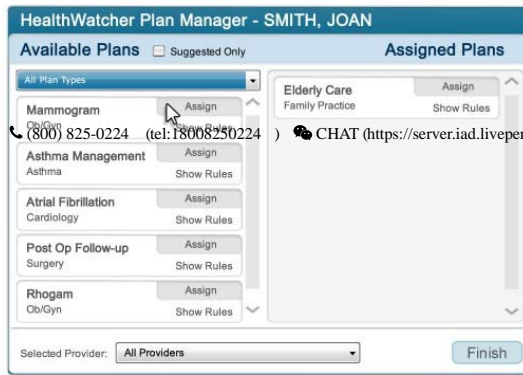

Configure the patient chart and organize the information the way you like it.

## Trend patient health over time & across visits

Predefined and custom flow sheets provide a graphical or table summary of changing factors, from patient's vital signs or weight to the treatments and medications given. Plus, results automatically populate in the flow sheet.

Label	04/04/2011		
BMI	25.7	04/11/2013	
Height	64	24.9	
Weight	150	64	Today's visit
BP Diastolic	100	145	23.8
BP Systolic	140	90	65
		134	143

## Create custom health plans

HealthWatcher™ automatically sends reminders to you and your patients with medical advice and healthcare best practices. Easily create **customizable health plans** based on clinical decision support and parameter-based triggers.

### Customizable medical plans

Build custom plans to manage specific conditions based on factors such as age, sex, diagnosis and lab results.

### Automatic patient alerts

The EHR software automatically generates alerts for appointment recall, prescription refills and lab orders.

### Individual or group patient plans

Health maintenance plans and protocols can be assigned to individual patients or a group of patients.

## Analyze, monitor & quantify population health

Use built-in and customizable reports to analyze and monitor patient populations. Improve the quality of care and ensure consistency of care across your practice.

### Meaningful use reports

Quickly track and review the progress toward meaningful use compliance.

### Query by clinical data

Easily build patient lists with structured data and results.

### Health analytics

Patient health analytics allow you to quantify your healthcare processes and outcomes.

( / )

## Receive & share health information electronically

[MARKETPLACE/marketplace](#) [LOGIN \(https://login.advancedmd.com/\)](#)

Yes it's interoperable, our EHR software allows you to coordinate care across settings.

Electronically receive and exchange orders, results, referrals, consults, medical histories, summaries and more.

### Submit health data to registries

Electronically transmit health-related data to immunization, public health registries and cancer registries.

### Manage transition of care

Share patient clinical information with outside entities: hospital, next provider of care and health information exchanges.

### Secure document exchange

Interfaced lab and imaging results automatically flow to the patient chart. Saving time for you and your patients.

## Engage with your patients online

AdvancedMD **patient portal** gives your patients a secure, convenient online portal to schedule appointments (/medical-scheduling-software), communicate, request prescription renewals, as well as make payments with a credit card (/practice-management-software#collect-copay-balances).

### Reduce phone calls

Save time from tracking lab results and prescription refill requests. Data is posted to patient accounts for easy, convenient access.

### Provide results & summaries

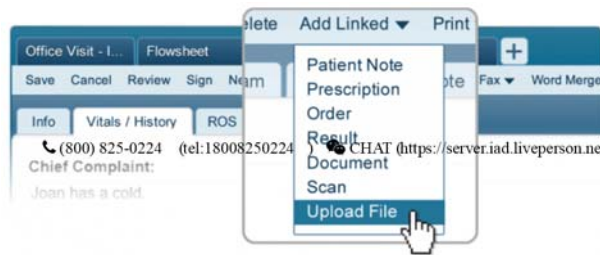

Deliver care summaries, lab results and patient education through the convenience of the patient portal.

### Secure communication

Patients can access their medical records through an online portal in a secure, HIPAA compliant environment.

(//)

## Manage documents, images, audio & video

Quickly sort, search and summarize documents and images. You and your staff can embed, annotate and manage documents and images from anywhere within the EHR software system.

### Use multiple file types

PDF, JPG, Microsoft Word, TIF, GIF, BMP as well as a variety of audio and video files.

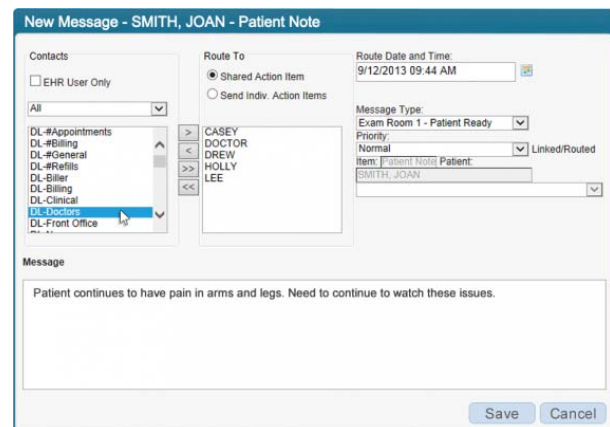

### Upload & attach documents

Easily attach uploaded files to a patient record based on a specific visit.

## Synchronize & coordinate staff communication

Eliminate sticky notes, phone tag, and yelling down the hall. Unified messaging is a secure communications platform built into the EHR that allows your staff to easily communicate so the patient has a **professional**, seamless and consistent experience from check-in to checkout.

## Disclosure Statement

AdvancedMD is 2014 Edition compliant and has been certified by Drummond Group ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of the U.S. Department of Health and Human Services. This certification does not

represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments.

As a cloud technology, AdvancedMD is an all-inclusive product and service. In agreement to the AdvancedMD terms of service the eligible professional pays a monthly service fee for a comprehensive product. This certified product-version requires a monthly service fee that enables ePrescribing, computerized provider order entry, formulary checking, interaction checking, VDT (view, download, transmit), clinical information reconciliation, transmit transitions of care, patient education and secure messaging (Modules tested: 170.314.a.1-15; b.1-5,7; c.1-3; d.1-9; e.1-3; f.1-3; g.2-4).

This certified product-version may require ongoing monthly costs to support reporting to immunization registries and public health registries (170.314.f.2, 170.314.f.6). This certified product-version may require additional fees for interfaces, configuration, or other required patient services.
